...to Paradigm Shift

What's Next?

A New Business Model

- Develop a new business model to advance *fluidic valve control* based on *openness*. Members of **FastFlow**[®] *Syndicate* have worldwide access to LTG's intellectual properties and knowhow under cross-licensing provisions. **FastFlow**[®] *fluidic* component parts are sold at fair value prices with an *explicit* use-license attached. Manufacturing facilities may acquire the status of a **HydrAssembly** plant provided *anti-Madoff* governance and accountability measures are adopted. No end-use specific license will be fixed by LatchTool Group that works to the disadvantage of any active **FastFlow**[®] *Syndicate* member.
- LatchTool Group operates in partnership with [Pointman Leadership Institute](#) on issues of ethics and moral appropriateness.
- More details to follow...

FastFlow[®]*fluidics*

valves & microhydraulic components

Part of LTG

LatchTool Group set out to make compact hydraulic tools. Along the way LTG discovered a class of fluidic valves that transforms single-acting cylinders into compact fluid power systems. From automatic transmissions to multispeed actuators, self-contained microhydraulics interfaced with electromechanical drives and wireless power platforms are tomorrow's innovations today.

FastFlow[®] *fluidics* sells annular flow controls, miniature hi-bar pumps, microhydraulic systems and remote high-force actuators.

FastFlow[®] *fluidics* – Immense power density with intelligence™
