

# LATCHTOOL GROUP

## PowerPliers™

Slider opens & closes the Jaws  
and releases the grip

Cutting and shearing  
edge included

Button releases Handle  
Lever to engage hydraulics

One squeeze achieves locked  
gripping force, multiple squeezes cut  
through wire, nails, and small bolts

### Capabilities

- Provides up to 50% more gripping pressure with only ½ the hand force required by traditional locking pliers
- The jaws adjust to the size of the object being grasped automatically
- A squeeze immediately provides the locked gripping force needed to grasp an object
- Additional squeezing provides feedback to the user as to how much gripping force is needed to hold an object
- The slider gently releases the grip on the object for easy retraction
- Fast Flow™ technology within

Jaws open wide for  
larger objects

The short stroke of the Handle  
Lever allows for use by people  
with small hands
